Dominic Nguyen

Entry Level Full Stack Developer

Corona Del Mar, California   nguyendominic1998@gmail.com   949-612-5123

Versatile skill set in both full stack development with a main career focus on back-end development. Solid understanding of coding fundamentals and with my knowledge of UX & UI, can also design with ease. Knowledgeable in implementing JavaScript libraries and APIs in projects. A quick learner so dipping into other languages or libraries will be easy with knowledge of pervious works.

EDUCATION

Full Sail University,
Winter Park, Florida
BS Computer Science
Valedictorian,
Web Design & Development
Creative Minds Scholarship
2018-2020

Current Experience

2020 *Medical device marketing company*
IT. Support & Assistance by remote settlement conferences for Judge Protem Orange Country Superior Court.

2020 *Medical device marketing company*
WordPress development of new web site with new logo and corporate branding guidelines, incorporating client testimonials, blogs, company and personnel profiles, case studies, and capturing contact information.
Reference: Carol Holt, Principal.

Completed Projects

2020 Three Headed Dragon
Thesis project: a DND 3.5e character creator that stores multiple characters. Site includes basic bot spam prevention in forms, and a password forget system. Data stored in the back end uses an API server to send data to and fetch data from the front-end. Site also uses JavaScript libraries to enhance the project. Created using React, Redux, and Express.
https://github.com/ddnguyen98/dndsite

2019 Paw Pals
Full stack development for a site that arranges play dates for dog owners, incorporating APIs to create user and dog data to make appropriate matches. Histories of matches were recorded and updated in a Google database. Created using React and Google Firebase API.
